

Sovereign Dentolite Sterilising Solution Concentrate

Used as a maintenance wash or to sterilise mould and algae affected areas before decorating.

Product Code
30806437

Description

Dentolite contains a powerful biocide that will eradicate moss, mould and algae on internal surfaces.

Form Supplied: Liquid concentrate

Pack Contents: 500 ml (makes 5 litres)

Colour Range: Clear

HSE No: 4593

Contains: 7.5% w/w Benzalkonium Chloride

Properties

Dentolite is used to sterilise mould and algae infected surfaces before redecorating or removal of wallpaper.

May also be used as a maintenance wash to control mould or algae where painting is not possible or desired.

Dentolite is not suitable for the remedial treatment of the dry rot fungus. For this application use Sovereign Fungicidal Wall Solution Extra and refer to Sovereign Specification for Dry Rot.

Preparation/Usage

1. Prepare surfaces by removing loose material e.g. distemper, grease, dirt, mould or wallpaper.
2. Dentolite Sterilising Solution can be used to soak wallpaper before removal to minimise any further mould infection.
3. Make good any surface defects and rub down to smooth finish.
4. Wash down with Dentolite Sterilising Solution using scrubbing brush or cloth. Allow to dry thoroughly. Apply second wash in badly affected areas and allow to dry before redecorating or re-painting.

Application

By sponge, cloth or brush.

Sovereign Dentolite Sterilising Solution Concentrate

Technical
Data Sheet **45**

DRYING TIME

1-4 hours normally.

GENERAL

There are basic measures to assist in the control of condensation and black mould. The Dentolite system complements these basic controls and will prevent these problems occurring for many years.

These methods are particularly helpful in the domestic environment but can be applied equally to commercial, catering, leisure or medical establishments.

It is always important to reduce the risk of condensation by observing the following simple recommendations.

- ✓ Ensure rooms are always warm and properly ventilated, maintaining some low heating throughout the day if possible.
- ✓ When cooking, washing, bathing or drying clothes, keep the door closed and the window open - this prevents warm moist air moving to colder areas of the building.
- ✓ In cold weather keep some heating on all the time.
- ✓ If a paraffin or flueless gas heater is used ensure a window is open a little (every litre of paraffin produces about 1 litre of water).
- ✓ Improve internal/external wall insulation.

Improve ventilation with Sovereign Passive Vapour Vents in living/ bedrooms and Sovereign Humidity Tracking Fans in kitchens and bathrooms.

GENERAL MAINTENANCE

Sovereign Dentolite will not prevent the re-growth of moss or mould in the long term. Its use is to remove active attacks prior to decoration.

For long-term eradication of mould etc. a Sovereign ConCure 20/20 can be fitted in the loft space. This device acts to produce a positive air pressure within the domestic environment and will keep the relative humidity below a level that will support condensation. Unlike other similar systems the Sovereign ConCure 20/20 will not cause cold draughts in the winter.

COVERAGE

6 - 8 m² per litre when diluted, depending on the porosity and roughness of the surface.

Storage: Between 5°C - 30°C.

Shelf Life: 12 months unopened.

HEALTH & SAFETY

- ! Contains Quaternary ammonium compounds, benzyl-C12-16-alkyldimethyl, chlorides
Signal Word - DANGER
- ! Causes severe skin burns and eye damage.
Very toxic to aquatic life with long lasting effects.
- ! If medical advice is needed, have product container or label at hand. Keep out of reach of children. Do not breathe dust/fume/gas/mist/vapours/spray. Avoid release to the environment
Wear protective gloves/protective clothing/eye protection/face protection
