

Sovereign Fungi-Chek Emulsion

Sovereign's high quality acrylic emulsion for use on internal surfaces where mould is a problem.

Product Code

Brilliant White: **30806432**

Magnolia: **30806433**

Description

Fungi-Chek Emulsion is a high quality acrylic emulsion suitable for the usual wall and ceiling surfaces where mould growth is a problem.

Fungi-Chek Emulsion contains a powerful and proven fungicide that provides long-term protection of the paint film.

Form Supplied: Liquid, ready to use

Pack Contents: 5 Litres

Colour Range: Brilliant white and magnolia

HSE No: 6477

Properties

Fungi-Chek Emulsion is moderately resistant to attack by salts in new plaster and similar surfaces.

The paint film remains fungicidal for the life of the coating. Fully washable and resistant to the effects of condensation once the coating has fully dried.

Preparation

1. Prepare surfaces by removing non-washable and loose material e.g. distemper, grease, dirt, mould or wallpaper. Dentolite Sterilising Solution can be used to soak wallpaper before removal to minimise any further mould infection.
2. Make good any surface defects and rub down to smooth finish.
3. Wash down with Dentolite Sterilising Solution using scrubbing brush or cloth. Allow to dry thoroughly. Apply second wash in badly affected areas and allow to dry.
4. Treat all bare areas with appropriate primer or undercoat/sealer.
5. If the surface is chalky or friable apply 1 liberal coat of Sovereign Stabilising Solution.
6. Fungi-Chek may be applied by brush, roller or spray. STIR THOROUGHLY BEFORE USE.

Usage

Prepare surfaces as described above. Prime bare areas with one coat Fungi-Chek Emulsion thinned with water and allow to dry.

Apply two coats Fungi-Chek Emulsion, allowing sufficient drying time between coats (approximately 4 hours).

Sovereign Fungi-Chek Emulsion

Technical
Data Sheet **145**

DRYING TIME

Single coat at normal thickness: up to 4 hours before re-coating. Where condensation is likely to return and be persistent, allow at least 24 hours before removing extra heating or ventilation.

GENERAL

There are basic measures to assist in the control of condensation and black mould. The Fungi-Chek System complements these basic controls and will prevent these problems occurring for many years.

These methods are particularly helpful in the domestic environment but can be applied equally to commercial catering, leisure or medical establishments.

It is always important to reduce the risk of condensation by observing the following simple recommendations:

- ✓ Ensure rooms are always warm and properly ventilated, maintaining some low heating throughout the day if possible.
- ✓ When cooking, washing, bathing or drying clothes, keep the door closed and the window open - this prevents warm moist air moving to colder areas of the building.
- ✓ In cold weather keep some heating on all the time.
- ✓ If a paraffin or flueless gas heater is used ensure a window is open a little (every litre of paraffin produces about 1 litre of water).
- ✓ Improve internal/external wall insulation.
- ✓ Improve ventilation with Sovereign Passive Vapour Vents in living/ bedrooms and Sovereign Humidity Tracking Fans in kitchens and bathrooms.

LIMITATION

Do Not overcoat

Overcoating Fungi-Chek Emulsion with normal paint coating will allow re-growth of black mould, as the fungicides will no longer be at the surface.

CLEAN UP

Clean brushes with water.

COVERAGE

11 to 13 m²/litre. Extra allowance should be made for particularly coarse or porous surfaces.

Storage: Between 5°C – 30°C.

Shelf Life: 12 months unopened.

HEALTH & SAFETY

- ! Contains 0.28% Propiconazole 0.3% 3-Iodo-2-Propynyl N-Butyl Carbamate
- ! Keep out of reach of children.
- ! Do not breathe spray.
- ! In case of contact with eyes rinse immediately with plenty of water and seek medical advice.
- ! Use only in well ventilated areas. In case of insufficient ventilation when spraying wear suitable respiratory equipment.
