

Sovereign Hey'di Barrier Mortar

A hydrophobic, non-shrinking repair mortar that forms an integral part of the Sovereign Hey'di K11 Tanking System.

Product Code
30607688

Description

Sovereign Hey'di Barrier Mortar is a hydrophobic, non-shrinking repair mortar. It is an integral part of the Sovereign Hey'di K11 Tanking System, used to create a fillet at wall/wall and wall/floor junctures.

Form Supplied: Powder

Pack Size: 25 kg

Colour Range: Grey

Contains: Cement and additives

Properties

Forms a water resistant mortar that does not shrink and has excellent adhesion to concrete and mortar. Can be used as a general repair mortar where shrinkage must be avoided. Hey'di Barrier Mortar has a long pot life, typically 5 hours ensuring that wastage is kept to a minimum.

Preparation/Usage

Hey'di Barrier Mortar should be applied to a damp substrate. When using with the K11 system apply a 25 mm fillet into all vertical and horizontal joints. It should be applied onto the first coat of Hey'di K11 before it has cured. This will typically be around 1 hour application of the Hey'di K11, and care should be taken not to damage the underlying coating.

Hey'di Barrier Mortar can also be used as a general repair compound for patch filling of masonry wall and floors.

General

When cured it has a compressive strength of $>40\text{N/mm}^2$. Do not use in temperatures below 5°C .

Drying Time

Allow the barrier mortar to stiffen for 2 – 3 hours and then apply the second coat of Hey'di K11 to the substrate and over the Hey'di Barrier Mortar.

CLEAN UP

Wash all tools and equipment before the product has dried.

Hey'di Barrier Mortar is extremely difficult to remove once dry.

COVERAGE

As 25 mm fillet = 25 linear meters

As repair compound = 15 linear meters

Storage: Between 5°C – 30°C. above ground in dry conditions.

Shelf Life: 12 months in unopened bags.
