

Sovereign Latex Polymer Additive

Improves the adhesion, water resistance, salt resistance, integral strength and durability of Sovereign Floor Levelling Compound.

Product Code
30806236

Description

Sovereign Latex Polymer Additive is a ready to use emulsion and will improve adhesion, water resistance, salt resistance, integral strength and surface durability of Sovereign Floor Levelling Compound.

Form Supplied: Liquid, ready to use

Pack Sizes: 5 Litres

Colour Range: N/A

Contains: Carboxylated styrene butadiene rubber

Properties

Sovereign Latex Polymer Additive is the easiest, most efficient and accurate way to improve the qualities of Sovereign Floor Levelling Compound, as the exact quantity of polymer is quality controlled in production.

Sovereign Latex Polymer Additive

Technical
Data Sheet **30**

PREPARATION

Surfaces must be clean and free of contamination before the laying of any floor coating. Porous substrates should be primed with a dilute solution of Sovereign Neoprene Primer. Non-porous surfaces must be Primed with neat Sovereign Neoprene primer.

Do not use Latex Polymer Additive as a primer as the Neoprene Primer will ensure better adhesion is achieved, also using the Latex Polymer Additive may lead to insufficient quantities being available for the mix.

USAGE

Add the Latex Polymer Additive to the mixing vessel and slowly add the Sovereign Levelling Compound whilst stirring with a mechanical whisk. Add one full bag of Sovereign Floor Levelling Compound to 5 litres of Latex Polymer Additive. The bottle of additive contains the correct addition of polymer for one full bag, however extra water, up to 1 litre, may be required to achieve the correct consistency. When fully mixed lay the leveler as normal.

CLEAN UP

The increased adhesion given by the Latex Polymer Additive will make cleaning of tools difficult if allowed to dry. Therefore clean tools and equipment with soapy water while the product is still wet.

COVERAGE

5 L Latex Polymer Additive to one full bag of Sovereign Floor Levelling Compound.

Storage: Between 5°C - 30°C.

Shelf Life: 12 months unopened.

HEALTH & SAFETY

- ! Avoid skin and eye contact.
- ! Handle only when wearing protective clothing.
- ! Wash splashes from skin with soap and water, flush eyes with copious amounts of water and seek medical attention if irritation persists.
