

## Sovereign Mortamix

A quality plasticiser for use  
in mortars and renders.

### Product Code

5 Litres: **30806252**

25 Litres: **30806253**

### Description

Sovereign Mortamix is a quality plasticiser for use in mortars and renders.

The addition of Mortamix improves the workability, reduces water requirement and precludes the need for lime.

Form Supplied: Liquid concentrate

Pack Sizes: 5 and 25 Litres

Contains: Synthetic surfactant and maleated rosin

### Properties

Sovereign Mortamix is an air-entraining admixture that improves the workability of mortars.

Microscopic air bubbles cause the mortar to become "lubricated" so making the mix plastic and workable.

The added advantage of air-entraining admixtures is that they reduce the amount of water required so improving the cure of a mortar. They also help improve protection of the mortar from frost damage both during laying and for the life of the mortar.

Sovereign Mortamix has been independently tested to and passes EN 934 - 3: Admixtures for masonry mortar.

## PREPARATION

Can be either added straight in to the mix or a gauging solution can be made by diluting 1 litre of Mortamix with 20 litres of water

## USAGE

Sovereign Mortamix can be added direct to the mix. The exact quantity of Mortamix required would depend on mix size; mix ratio and the sand being used. As a guide 250 – 500 ml will be sufficient for a mix containing 50 kg of cement.

## COVERAGE

A 25 litre tin will be sufficient for up to 100 mixes. Caution should be taken not to overdose or over-mix the mortar, as this will have a detrimental effect.

**Storage:** Between 5°C – 25°C.

**Shelf Life:** 12 months unopened.

## HEALTH & SAFETY

- ! Avoid skin and eye contact.
- ! Handle only when wearing protective clothing.
- ! Wash splashes from the skin with soap and water, flush eyes with copious amounts of water and seek medical attention if irritation persists.
- ! Contains Rosin, fumarated. May produce an allergic reaction
